

## SUMMARY

---

I'm a software engineer specializing in Ruby, Javascript, SQL, and Go. I love working with new technologies and I feel most at home designing and building features in the backend. I'm currently working at a Series A funded startup as part of a highly efficient 3 person engineering team. I'm looking for a position that gives me the opportunity to work on complex problems at scale and to learn from people who are passionate about doing great work.

## SKILLS

---

- Ruby, JavaScript, Go
- Ruby on Rails, Node, React
- SQL, NoSQL, Elasticsearch, GraphQL
- HTML, CSS, jQuery
- React Native, Swift
- TDD, BDD
- REST API design
- Relational database design
- Heroku, AWS, Google Cloud Platform
- Agile/Scrum methodology

## EXPERIENCE

---

### Full Stack Software Engineer

Oct 2017 to Present

*East Meet East Inc.*

*New York, NY*

- Series A funded dating service with ~20,000 daily active users
- Ruby on Rails API, React Client, React Native Android, Swift iOS, Go serverless functions, infrastructure in Google Cloud Platform
- Full stack ownership over each feature from design to implementation
- Manage and review code for contract engineers

### Cofounder, Lead Software Engineer

Jan 2015 to Oct 2017

*Insurance Skout, Inc.*

*Remote (San Francisco, Denver, New York)*

- Cofounded a software company in the health insurance space.
- Created a SaaS platform for insurance agencies/brokers with ~80 paying customers.
- Designed and built Ruby on Rails app, PostgreSQL db, and Go/Elasticsearch microservices.
- Managed a team of 3 using Agile/Scrum methodology.

### Software Engineer

Jan 2015 to Oct 2017

*Freelance*

*Remote (San Francisco, Denver, New York)*

- Created various web and mobile applications as part of a small contractor team.
- Designated as the primary backend engineer specializing in databases and APIs.

### Software Engineer

Jan 2014 to Dec 2014

*West Arete (Custom Software)*

*State College, PA*

- Created software primarily using Ruby on Rails with an emphasis on TDD.
- Promoted from an apprenticeship into a full time salaried role.
- Worked with high profile clients such as Pennsylvania State University and the DoD.

## EDUCATION
